**A Full Service  
Technology Company**

As a technology systems solution provider since 1987, Triax Technology Services (Triax) is committed to providing the best quality products and services to our customers. Our management is comprised of professionals ranging from 10 to 30 years experience. Our goal is to reduce our customers' technology cost, while improving infrastructure performance & management. The Management of Triax has been working with fortune 500 companies for over 30 years, providing local & global network infrastructure planning, design, implementation, and management. Using innovative & emerging technologies and the world's most powerful and dynamic network, the Internet, to achieve business goals.

Triax has the vision, experience & technical expertise to integrate new custom system designs that will best suit your business & personal needs. For those who need further assistance in determining the best solution for their business, our free, friendly personalize sales staff will be happy to assist you. Our team will work with you to put the necessary technology in place to ensure that your business operates securely, at the highest performance, and is scalable to accommodate growth and future applications.

Our Client list includes; colleges in the greater New York area as well as law firms, medical institutions, financial institutions and many other business from a variety of industries.

Whether you are seeking to better manage your messaging system, cabling system, file management system, E-commerce, or to completely or partially outsource any aspect of your technology requirements, Triax is the company for you.

We are aware that each one of our clients has a unique approach to the way they conduct their business; and services their markets.

At Triax, we personalize each office system to reflect that individuality for maximum effectiveness.

Triax can completely be responsible for the planning (budget, resource, timeline, etc.), design, management, and implementation phases, or work as a valued team member or lead in a collaborated effort with company representatives.

Triax has established a reputation for completing projects on time, and oftentimes under budget. The value Triax Technology brings to our clients is the ability to capitalize on emerging technologies to reduce the total cost of technology ownership, and increase the productivity of the work force by working smarter, not harder.

At Triax, we know the value of great customer service. Attracting new customers and keeping the ones you have is a common challenge for business. We can assist your team to accomplish their goals, with the right technology and management.
